Please verify all dimensions prior to installation.

Important Notice for Québec Consumers:

WarmlyYours does not provide repair services for this product. No replacement parts are available for the mirror (glass), additional hardware, LED lightbulbs, mounting brackets, or electrical wiring. If your LED mirror fails within the warranty period, we will replace the entire unit according to our warranty policy. Our technical support team is available 24/7 by phone for installation and troubleshooting assistance. For full details, see our Return Policy. This notice is provided in accordance with Québec's Consumer Protection Act, section 39 (as amended in 2025).

Mounting Instructions

Step 1

Step 2

Step 3

Step 4

Step 5

Step 6

The Judy LED Mirror features a side-mounted touch power button. Once hardwired, simply touch the button to turn the mirror on or off. While they can be connected to a wall switch, we don't recommend it, as both the switch and touch button would need to be used.

JUDY LED MIRROR
INSTALLATION MANUAL
MR-3624H-JUD

Horizontal Mounting Instructions

Step 7
(optional)

This is an optional way to adjust the plumb of the mirror in relation to the wall it's mounted on.

Using the Side-Mounted Touch Control

Controlling the LED lighting for the Judy is accomplished by touching the side-mounted on/off button.

To turn the Judy's LED lighting on or off, simply give the on/off button a quick touch.

When the Judy's lighting first comes on, the color temperature of the lighting will be a cool white (6,500K).

To cycle the color temperature to a warmer 3,000K, simply hold the touch on/off button for a few seconds until the light completes its color transition.
