

Summit Towel Warmer Series

Dual Connection 120 VAC

The Summit Towel Warmer offers a luxurious and practical addition to any bathroom, blending elegant design with powerful performance. With options for both polished stainless steel and matte black finishes, and flexible dual connection for plug-in or hardwired installation, you can customize your experience to perfectly match your home's aesthetic and your personal needs.

TWO FINISHES

**Polished
Stainless Steel**

**Matte Black
Stainless Steel**

From the warmth of eight bars plus a heated shelf to the innovative TempSmart protection and a range of smart control options, every detail is crafted for your comfort and convenience. Installation is straightforward, ensuring you can quickly enjoy the simple pleasure of a warm towel.

PRODUCT FEATURES

Features

Step into a sanctuary of warmth and classic elegance. The Summit Towel Warmer Series is designed to elevate your daily routine, combining the timeless appeal of soft, rounded contours with unmatched heating capacity. Featuring eight gently curved vertical bars and a unique, integrated three-bar heated top shelf, the Summit offers ample space to warm multiple towels and bathrobes simultaneously. Beyond its generous capacity, every detail—from the seamless dual-connection flexibility to the state-of-the-art integrated controls—is engineered to bring sophisticated utility and a spa-like atmosphere to your home.

Heated Canopy Shelf

Maximize your bathroom's vertical space. The innovative, heated 3-bar top shelf is perfect for warming folded towels, bathrobes, or slippers, while the 8 main bars easily accommodate two large bath towels.

Dual-Connection Versatility

Enjoy ultimate flexibility. Plug the unit into a standard outlet for a quick, DIY setup, or have it professionally hardwired for a clean, cord-free look — both options are supported out of the box.

Seamless Wall-Mount Design

By routing the hardwire connection directly through the mounting bracket and inside the leg, the Summit eliminates the need for an unsightly wall plate or exposed junction box. This ensures a perfectly flush, minimalist aesthetic.

State-of-the-Art LED Control

Experience modern convenience at your fingertips. The Summit features a sleek, integrated power switch with a discrete blue LED indicator light. This state-of-the-art design is flush-mounted to maintain the towel warmer's clean, minimalist lines while providing a clear, elegant visual cue when the unit is operating.

TempSmart Safe-Touch Heating

Engineered for family-friendly safety. Built-in TempSmart technology automatically regulates the surface temperature, preventing the unit from overheating while maintaining a safe, consistent warmth.

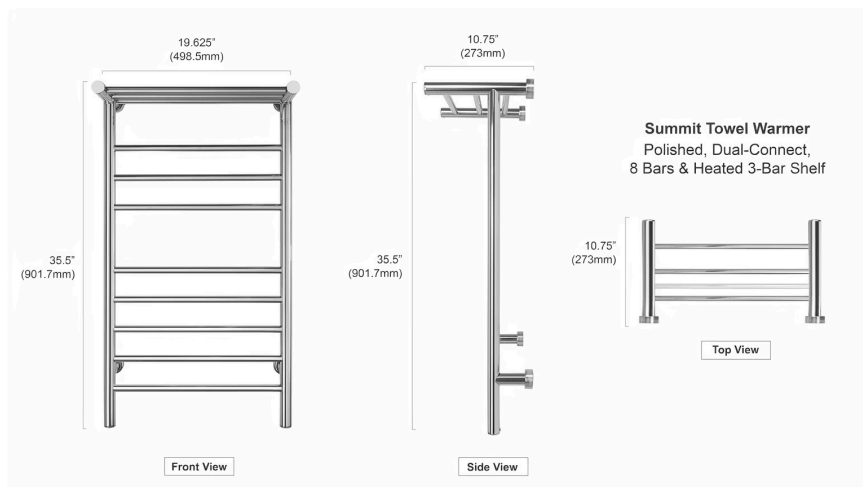

Eco-Friendly Efficiency

Indulge in daily luxury without the high energy bill. Operating at just 120 Watts, the Summit uses about the same electricity as a standard light bulb, costing only pennies a day to run.

PRODUCT SPECIFICATIONS

Product Specifications

Review the technical details that power the Summit's classic comfort. These specifications outline the dimensions and electrical efficiency of our signature curved-bar design, engineered to accommodate the unique integrated heated top shelf.

Connection	Plug-in or Hardwired (Dual Connection)

The Hardwired WiFi Switch from WarmlyYours is an elegant and convenient control option for...

Smart home & voice control. Control remotely via the My Leviton app. Compatible with Amazon Alexa and Google Assistant — no hub required.

GK16-30090-0003 | \$109

Hardwired controls are compatible with hardwired installations only. For plug-in installations, contact us for plug-in timer options.

4 Simple Steps to Install

Bringing spa-like luxury into your home is simpler than you think. Thanks to its dual-connection flexibility, the Summit can be easily plugged in for a quick weekend project or professionally hardwired for a completely flush finish. Follow these four simple steps to begin your daily ritual of warmth.

Choose Your Connection Type

Decide whether you'll use the Summit as a plug-in unit or have it hardwired by a licensed electrician. For plug-in use, confirm a standard 120 VAC outlet is accessible near the intended mounting location.

Make the Electrical Connection

For plug-in installation, route the 77" cord to the nearest 120 VAC outlet. For a hardwired installation, have a licensed electrician complete the connection — no cover plate is required thanks to the Summit's unique design.

Mount the Unit to the Wall

Using appropriate wall anchors for your wall type, mount the Summit securely at a comfortable height. Ensure the unit is level and all mounting points are firmly secured before connecting power.

Power On & Verify Operation

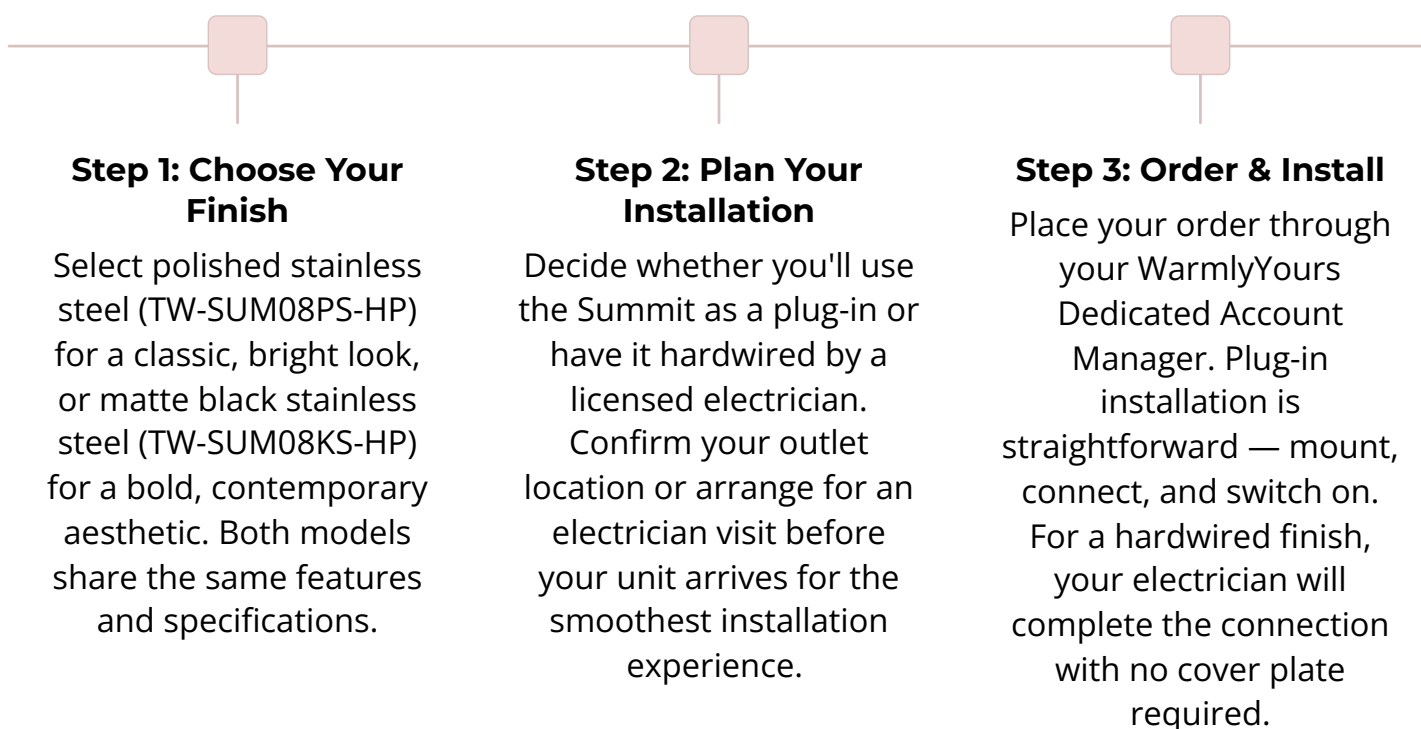

Switch the unit on using the integrated LED power switch. The LED indicator will confirm the unit is active. TempSmart protection is always operational — no additional setup is required.

ORDER INFORMATION

How to Order — It's Easy!

Choose your finish and confirm your installation type — we'll help you find the perfect Summit for your bathroom! The Summit Towel Warmer is available in polished stainless steel and matte black stainless steel, both with full dual-connection capability.

 **INSTALLER NOTE:** Power connects directly inside the mounting leg. Do not rough-in an electrical junction box at the mounting location.

- ☑ Questions about which finish or installation type is right for your project? Contact us — we're happy to help you choose the perfect Summit Towel Warmer for your bathroom.
